

Plastic Recycling Company (3 Locations, Multilingual Workforce)

Industry: Recycling & Manufacturing

Employees: 50 (3 locations)

Challenge: Paper-heavy compliance & language barriers

The Problem:

This recycling company operated across three locations with a multilingual workforce. Training was handled with paper forms and binders, making it slow and inconsistent. Spanish-speaking employees often struggled with materials, creating safety risks and compliance gaps.

The Solution with ProactEHS:

ProactEHS digitized the training process and provided **translated training modules in Spanish**. Safety records and completion reports were centralized, making compliance visible across all three locations.

The Results:

- **\$10,000 annual savings** by eliminating paper and administrative overhead.
- Increased training comprehension and engagement from Spanish-speaking employees.
- Stronger compliance and reduced risk across all locations.
